

SIVAELANGO PERIYASAMY

Test Architect | Test Manager • Test Strategy • Automation Frameworks • Delivery Governance • Playwright / Selenium

+91-9962748444 • shaisivams@gmail.com • linkedin.com/in/shaisivams • Portfolio • 15 Years (10+) • Test Architect | Test Manager

PROFESSIONAL SUMMARY

Test Architect and Test Manager with 15 years (10+) in quality engineering, test automation, and testing delivery. Owns test architecture and test strategy—framework design, environment strategy, tool landscape, and efficiency targets—while managing testing delivery: project planning, effort estimation, risk-based testing, defect management, and release readiness. Designs and maintains scalable test automation frameworks (Hybrid / TDD / BDD) for UI, API, and integration layers using Playwright, Selenium, Java, TestNG, and Page Object Model (POM); API testing with Postman, REST, and REST Assured. Embeds continuous testing and quality gates in CI/CD (Jenkins, GitHub Actions, Azure DevOps, GitLab). Drives shift-left, testability in design reviews, and root cause analysis. Performance and load testing (JMeter / VSTS) with baselines. Defines quality metrics and dashboards (JIRA, coverage, escaped defects, regression health) for executive reporting and stakeholder management. Mentors QA engineers and SDETs on test design principles, automation patterns, and code reviews. Generative AI-assisted quality (GitHub Copilot; AI & Machine Learning — IIT Madras) under governance. Outcomes: +30% automation coverage, -20% release cycle time, -40% production defects. M.Sc. Software Engineering; Certified Tester — STQC (ISTQB-aligned); PSM II; Lean Six Sigma Black Belt.

CORE SKILLS & COMPETENCIES

Test Architecture: Test Architect • Test Strategy • Test Architecture • Environment Strategy • Automation Framework Design • Hybrid / TDD / BDD • Tool Evaluation • Shift-Left • Testability • Continuous Testing • Quality Gates

Test Management: Test Manager • Testing Delivery Management • Project Planning • Effort Estimation • Risk-Based Testing • Defect Management • Release Readiness • Governance Reporting • Stakeholder Management • UAT Coordination

Automation & Engineering: Playwright • Selenium • Java • TestNG • Page Object Model (POM) • API Testing • Postman • REST • REST Assured • Integration Testing • Regression • Smoke • Functional Testing

CI/CD, Data & Performance: Jenkins • GitHub Actions • Azure DevOps • GitLab • CI/CD • SQL / Data Validation • Performance Testing • Load Testing • JMeter • Quality Metrics • Dashboards • JIRA • Root Cause Analysis

Leadership: Mentoring QA / SDETs • Code Reviews • Cross-Functional Collaboration • Product Owners • Architects • Agile • Scrum • Continuous Improvement

Certifications: Certified Tester — STQC (ISTQB-aligned) • Lean Six Sigma Black Belt • Professional Scrum Master II (PSM II) • AI & Machine Learning — IIT Madras • Generative AI (GitHub Copilot)

PROFESSIONAL EXPERIENCE

Quality Engineer Leader

May 2022 – Present

Test Architect / Test Manager scope — Test Strategy • Automation Frameworks • CI/CD Quality Gates • Delivery Governance

Granicus Technologies India Pvt Ltd — Enterprise SaaS Quality Engineering

CORE INDUSTRY FOCUS: Test Architecture • Automation Frameworks • CI/CD Quality Gates • Testing Delivery Governance

Skills: Test Architect / Test Manager Scope • Playwright • Selenium • Java • API Testing • CI/CD • JIRA • Quality Metrics • Mentoring

- Own test architecture and test strategy as Quality Engineer Leader with Test Architect / Test Manager scope—framework design, environment strategy, tool landscape, and quality standards (+30% automation coverage).
- Design and maintain scalable Playwright / Selenium / Java automation frameworks (POM, Hybrid / BDD-aligned) for UI, API, and integration; embed regression, smoke, and API suites in Jenkins / GitHub Actions / Azure DevOps / GitLab CI/CD quality gates.
- Manage testing delivery—project planning, effort estimation, risk-based testing, defect management, and release readiness; report quality metrics and dashboards in JIRA for stakeholders (-20% release cycle time).
- Drive shift-left and testability in design and code reviews; lead root cause analysis and continuous improvement on escaped defects (-40% production defects).
- Mentor QA engineers and SDETs on test design principles, automation patterns, and reviews; apply Generative AI (GitHub Copilot) for coverage and test-data productivity under governance.

Test Manager

January 2019 – May 2022

Cognizant Technology Solutions — Multi-Team Testing Delivery / Framework Governance

CORE INDUSTRY FOCUS: Test Management • Automation Framework Governance • Release Readiness • Quality Metrics

Skills: Test Manager • Test Strategy • Selenium • API Testing • CI/CD • JIRA • Defect Management • Stakeholder Management • Mentoring

- Led testing delivery across products as Test Manager—test strategy, planning, effort estimation, and governance reporting (defect leakage -40% on key streams).
- Governed automation framework design and reuse (Selenium / Java / API); integrated suites into CI/CD for continuous testing.
- Owned defect management, UAT coordination, and release readiness with product owners, architects, and development teams.
- Built quality metrics and JIRA dashboards for coverage, regression health, and executive reporting.
- Mentored QA engineers on test design and automation patterns—foundation for Test Architect ownership of strategy and frameworks.

Consultant – QA Lead

November 2015 – January 2019

Virtusa Consulting Services — PayPal / Distributed Platform Quality

CORE INDUSTRY FOCUS: API & Integration Architecture • Performance / Load Testing • Cross-Functional Delivery

Skills: QA Lead • API Testing • Integration Testing • Performance Testing • Selenium • CI/CD • Stakeholder Management

- Led API, integration, and UI automation across services—test plans, acceptance criteria, and framework patterns (+25% automation-enabled delivery).
- Supported performance and load testing and release coordination on distributed, high-availability platform flows.
- Partnered with architects and engineers on testability, coverage gaps, and root cause analysis.
- Tracked defects and delivery status for stakeholders; practiced risk-based testing on critical payment-adjacent paths.
- Built delivery-governance habits later scaled into Test Architect / Test Manager scope.

Quality Assurance Engineer

April 2014 – November 2015

Corporate Executive Board (CEB) — Enterprise Delivery

CORE INDUSTRY FOCUS: Keyword-Driven Automation • Smoke Testing • Agile Scrum • REST Services • Load & Performance

Skills: Java • Keyword Framework • Smoke Test Automation • JIRA • Agile • Sprint Planning • VSTS 2013 • Load & Performance Testing • RESTful Web Services

- Analyzed requirement specifications and created high-level and low-level test cases for enterprise delivery.
- Developed Java keywords, integrated them into the existing framework, and used that framework to automate smoke tests.
- Tracked and reported test results, case coverage, resource needs, and defect status in JIRA.
- Practiced Agile/Scrum through Sprint Planning, Sprint Retrospective, Product Backlog Refinement, and daily Scrum.
- Executed Load & Performance scripts in VSTS 2013 to find bottlenecks, and performed functional testing of RESTful web services.

Quality Analyst

October 2011 – March 2014

DCKAP Technologies — WorkGoal Product

CORE INDUSTRY FOCUS: WorkGoal Product QA • Functional / System / Regression • UAT & Production Support • Selenium POM

Skills: Test Design • TestNG • Java • Selenium • Page Object Model (POM) • Functional • System • Regression • UAT Support • Production Support

- Improved the WorkGoal product by analyzing specifications from Sales and Business Analyst teams and translating them into testable requirements.
- Created test cases, scripts, and test data for identified requirements and organized them into an overall test design.
- Coordinated with development to prepare the test environment; executed Functional, System, and Regression testing plus UAT and Production support.
- Automated the web application with Java, Selenium, and TestNG; implemented Page Object Model (POM) to reduce code redundancy.
- Built end-to-end regression automation scripts that raised overall test coverage across WorkGoal critical flows.

EDUCATION & CERTIFICATIONS

EDUCATION

Anna University | 2006 – 2011
M.Sc. — Software Engineering
(Computer Science / IT / Engineering related field; Bachelor's degree)

CERTIFICATIONS

- Certified Tester — STQC (ISTQB-aligned)
- Lean Six Sigma Black Belt
- Professional Scrum Master II (PSM II)
- AI & Machine Learning — IIT Madras
